Work Experience

Epiphany, Denmark — AI Engineer

September 2025 - PRESENT

- Development and maintenance of AI-powered applications using Django backend and Next.js frontend with containerized architecture on DigitalOcean
- Implementation of asynchronous pipelines via Celery for processing complex generative tasks
- Management of multi-tier database stack (PostgreSQL, Redis, S3 LocalStack) with query optimization and caching
- Automated deployment via Terraform CI/CD pipeline
- Third-party API integration: OpenAI for LLM, Mistral for document processing, Clerk for authentication

ArcaFondi, Milan — Software Developer

December 2022 - August 2025

- Development and maintenance of Data Distribution, an enterprise financial platform for multi-source integration (Bloomberg, Morgan Stanley, Morning Star, JP Morgan, BoNY)
- Java backend architecture with Webix frontend, heterogeneous database management (PostgreSQL, MongoDB, Sybase), and stored procedures
- Design and deployment of RAG-based chatbots using Azure OpenAI, Langchain, and Python Flask for automated customer support
- Development of public website with React.js and ClickHouse backend
- Research and implementation of emerging technologies: machine learning (Scikit-learn, TensorFlow), graph databases (Neo4j), Docker deployment
- Automation of operational processes using Shell scripting and Cron jobs
- Complete CI/CD management with Azure DevOps

Intesa San Paolo, Milan — Cyber Security & Testing

June 2020 - November 2022

- Quality assurance and test automation using Micro Focus UFT for software non-regression testing
- Backend API development and maintenance in Java and VBScript within Agile teams
- Autonomous management of projects in a Scrum environment with respect for timelines and deliverables

Skills

- Strong problem-solving skills
- Effective teamwork and communication skills
- Solid experience in Agile methodologies and Scrum frameworks

Interests

Active interest in Artificial Intelligence, Machine Learning, and NLP technologies, with experience in using Python frameworks such as TensorFlow and Langchain, and in integrating advanced language models (LLMs) such as GPT, Gemini, Claude, and LLaMA.

LDD Recordings, Milan— *Founder*

January 2018 - January 2020

I founded and managed a record label, producing, mixing, and mastering over 50 singles and signing two artists with major labels.

I developed and implemented effective marketing and branding strategies, contributing to the artists' growth.

I developed the public website using HTML and CSS and created several landing pages for single and album releases, with pre-save links and funneling.

Education

Full Stack Web Development Course (Choose U), Milan

Specialization in Java, JavaScript, Spring Framework, SQL, AJAX, jQuery

Scientific High School, Scuola Europa, Milan

Diploma with focus on mathematics, physics, and computer science

Languages

Native:

Italian, Spanish

Fluent:

English
